

	Tidal Pool–Sherry Buckner	
<div>sculpture 11</div>	Medium–Cement & cast stone stain	\$1,500
	<p>Buckner created this birdbath using circular forms to represent a tide pool. Notice that circles are used in different sizes and at different depths within the piece. Buckner wanted the birdbath to be both strong and able to hold water, so she chose concrete to construct this piece.</p> <p>The size of the birdbath is small enough to function as a birdbath and large enough to include actual size tidal pool life forms. Do you see the starfish and sand dollars? What else do you see?</p>	   <p>GPS coordinates: N 47° 40' 10.1" W 122° 07' 12.4"</p>
